What Do I Do When...

MY CABLE IS OUT

Do you have more than 1 television hooked up to cable?

If there is a cable outage, all tv's will be out. If one tv is working, it may be a problem with the television or a wire in the house.

Do you have a digital box?

If so, your television needs to be on channel 3 or the correct video input.

CABLE BOX IS NOT WORKING PROPERLY

Example: The guide feature isn't displaying accurately.

Reboot your system. Shut off the box and unplug it, plug it back in and wait until it powers back on.

MY DVR BOX OR CABLE BOX IS NOT WORKING PROPERLY

Example: The guide feature isn't displaying accurately.

Reboot your CISCO/Technicolor system. Shut off the box and unplug it, plug it back in and wait until the clock appears on the box before turning the device back on.

You can also go to SETTINGS, TROUBLE-SHOOTING, and select REBOOT SET TOP BOX.

To reboot your Motorola system, unplug the box from the power cord, wait a few minutes, plug it back in.

If you are still experiencing trouble, please call us at 1-800-252-1799 for further assistance.

A CHANNEL IS NOT WORKING

Example: Channel 24 is going in and out of service.

Give us a call! Your help in reporting channel problems can often times speed up the repair process. You may notify CASSCOMM of channel problems we may not otherwise be aware of.
